OBJECTIVE To continue a successful career in system design and development.

EXPERIENCE

11/97-Present

Technical Architect, AT&T, Chicago, IL

- Worked on developing Voyager SFA system for managing opportunities, contacts, and appointments for selling to medium sized businesses in VB5/6.
- Built BizOnTheNet Web site portal for the Enhanced Business Services Business Unit using Active Server Pages (ASP). It included a dynamic content management system.
- Designed and implemented Customer Information browser web site using ASP.
- Created Completelink/Simplelink Proposal Contract Generator web site using ASP. This was the preferred tool by the call centers for doing Completelink/Simplelink contracts.
- Created DSL Information web site (CMS site) using Active Server Pages.
- Customized Siebel Software for contact management.
- Automated batch load of Leads into Siebel system using ASP and an NT Service written in VB6.
- Taught lunchtime training class on MS FrontPage.
- Created a dynamic report design tool using Ajax and ColdFusion to do reporting off of Oracle databases.
- Developed Pricing tool using ColdFusion MX used to manage orders and installation of product for a customer worth over 250 million dollars. This system also would dynamically generate Excel spreadsheets from data off of an Oracle database.
- Have developed web interfaces that heavily use AJAX and XHTML to create a web application experience for the user.
- Have some moderate Java experience.

3/95-11/97

Programmer/Analyst, BENRUS WATCH COMPANY, Chicago, IL

Developed Windows applications with Visual Basic including:

- A jewelry proposal print program which prints proposals with full-color images.
- A Salesrep helper program which displayed images of jewelry on laptop PCs and allows the rep to quickly generate, print or fax jewelry orders.
- Wrote help files using Forehelp software.
- Created image launcher program which displayed images of styles on AS/400 emulated sessions.
- Set up and configured new NT Server running version 3.51.
- Upgraded and configured multiple PCs from Win 3.11 to Win 95.
- Telephony order tracking system. Could fax information to the customer too.

9/94-3/95

Consultant, COMPUTER HORIZONS, INC., Rosemont, IL

Designed and developed applications for the client CNA as follows:

- Designed and implemented the Loss Control interface for the Underwriter Work Station (UWS) in VB4 on an OS/2 environment.
- Made changes to the overall user interface on the UWS.

3/94-9/94

Programmer, AMERITECH LIBRARY SERVICES, Evanston, IL

- Worked on Horizon Academic Library Management Software used by Northwestern University (VB3).
- Worked on medical periodical query demo which was presented to Northwestern University (VB3).

12/87-3/94

Programmer/Analyst, BENRUS WATCH COMPANY, Chicago, IL

Developed Windows applications (with Visual Basic) including:

- A seamless Email system used internationally.
- Consolidated product editor.
- Created an imaging database (converting and compressing Kodak photo CD images to BMP format) used by sales, ordering, service and receiving departments.
- Used Rumba 400 APIs to interface PC with AS/400 to process purchase orders and automate invoice and work order releases.
- Wrote focused end user manuals and documentation for applications.
- Developed an extensive EDI system which processed various formats of ANSI X.12 transaction sets.

TECHNICAL EXPERTISE

Hardware	PCs	Apple Macintosh	IBM AS/400	
Platforms	Win 2000	Win XP	Apple OSX	iOS
Applications	Excel/Word/PowerPoint	Photoshop	Finalcut	Keynote
Languages	Visual Basic	Javascript	ColdFusion MX	Objective C
Databases	MS Access	Oracle	MySQL	SQLite
